

LIFESAFETY POWER Technical Support

LifeSafety Power's trained service professionals have over 70 years experience in configuring products for access, fire, security and CCTV applications.

FlexPower's modularity allows for many custom configurations: from the simple.... a single or dual voltage, power distribution to the sophisticated... provide three or more voltages, combine AC&DC power, charge large battery sets, monitor battery health online, reset frozen cameras remotely, receive service or system-trouble email alerts...and more.

If your requirements are not covered in our [catalogue of preconfigured systems](#) contact our [customer support team](#) and we will design a product for you.

Call or [email](#) to see what a FlexPower system will do for you!
