LIFESAFETY POWER MEDIA RELEASE

For immediate release

LifeSafety Power to Showcase Industry-Leading Power-Connectivity Solutions at GSX 2021

Phoenix, AZ, September 23, 2021—LifeSafety Power will showcase its award-winning intelligent networked power supplies at booth 1463 during this year's GSX show, September 27-29 in Orlando. Featured products include:

FPO Generation 2

Recently redesigned and re-engineered with updated features and capabilities, the FlexPower[®] FPO Generation 2 (Gen2) power supply line brings additional enhancements to both installers and users in the access control market.

FlexPower Gen2 includes the groundbreaking OutSmart[™] visual voltage indication across all boards, visually showing the technician the output voltage of the power supply boards and each distributed output. Optional RS-485 capability on FPO and M8 devices allow larger managed systems on fewer network drops with the NLX NetLink[™] network communications module. Added data points such as AC input voltage and main output current measurements on the FPO power supply and output cycle counts on the M8 yield a comprehensive view of overall system health. Refinements like built-in low battery disconnect and battery current sensor foster cleaner installations.

E12M and E12S Enclosures

One of the most spacious enclosures in the industry, the E12 is available in Unified Power or ProWire with dimensions of 48 (H) x 36 (W) x 8 (D). The E12 handles larger enterprise access control deployments—accommodating more access control boards, power supplies and managed outputs in a single enclosure for hardware and deployment savings.

The E12 houses up to three FlexPower FPO power supply boards to allow up to 750 Watts of power to locking hardware, access control boards and auxiliary devices. It comes in two configurations: the E12M integrates with authentic Mercury Systems and handles 24 doors of access control; E12S integrates with Software House (SWH) controllers to handle up to 32 doors.

Access Control Integrations

LifeSafety Power's solutions integrate with several industry-preferred access control security management software platforms, including Genetec Security Center; OnGuard[®] for Lenel S2; and C•CURE 9000 from SWH.

Security Center Integration for Genetec

Leveraging the **Genetec** integration between NetLink network communication device and Security Center, users can seamlessly add NetLink devices into the software platform, allowing real-time alerts to appear directly within the interface. From Security Center, users receive detailed data on the health and viability of power, connected locks and other devices. NetLink lets users remotely monitor, control, program and report on system power and connected devices and features patented battery management that includes health reporting, remote battery testing, email/SNMP alerts and other proactive notifications.

OnGuard Integration for LenelS2

The **LenelS2** integration allows LifeSafety Power's NetLink NL4 and NLX Network Communication Modules to interface with OnGuard access control software versions 8.0, in addition to 7.6, for advanced power management of enterprise access control systems. NetLink adds proactive monitoring and management capabilities to LifeSafety Power's power systems, interfacing directly to the OnGuard platform, with all power system alerts indicated on the OnGuard software.

CCURE integration for SWH

The native integration with **SWH C•CURE 9000** and LifeSafety Power's intelligent network monitoring modules allows users to receive and centrally manage alerts and notifications through the software, for monitoring and control of PSX power and distribution modules sold and supported through SWH. Critical networking notifications are driven directly into C•CURE 9000, relaying real-time data and analytics on the health and viability of iSTAR door controller power, lock power and battery condition.

ProWire Unified Power Systems/Helix

ProWire Unified Power Systems, the highest level of integration between a power system and an access control solution, are an installer's blueprint for consistent, streamlined power installations. ProWire makes it simple to create a connected power campus, eliminating installation variability for repeatable and professional results. Network-connected ProWire systems can interface directly into Mercury Security or SWH C•Cure 9000 platforms, allowing users to receive, manage and control alerts and notifications. ProWire is compatible with Multi-Site Manager (MSM) Enterprise[™], which yields advanced analytics so end-users can actively network, monitor and manage connected power solutions for greater uptime and dependability.

Helix AC/DC is the only solution for mission-critical applications in government, finance, medical and high-tech industry vertical markets. Designed for seamless failover protection with automatic backup switchover of AC or DC power, Helix reduces the risk of system downtime or outage and features network management for predictive reporting that optimizes and maintains the highest levels of performance. AC Helix monitors separate AC branch circuits, reporting trouble with a primary

Power is knowledge.

LifeSafety Power®

branch immediately and instantly transferring power to backup for uninterrupted system operations. DC Helix uses redundant power supplies to instantly transfer power to the backup supply on failure of the primary supply. Helix is now available in Standard, Unified Power and ProWire configurations to provide the ultimate protection to any access control power system.

About LifeSafety Power*

LifeSafety Power is a premier manufacturer of intelligent power management systems for physical security and access control and the chosen standard for many Fortune 500 companies around the world.

LifeSafety Power has created new categories of access control power including intelligent power systems which increase the reliability of the security infrastructure, and prewired power systems which decrease labor while providing more consistent installations across an enterprise. These innovations have led to LifeSafety Power becoming the power system of choice for leading access control panel OEMs throughout the security industry.

LifeSafety Power has won numerous industry awards for product design and innovation, including the prestigious Security Industry Association New Product Showcase, SSI Most Valuable Product and most recently the Security Today 2021 New Product of the Year.

LifeSafety Power is part of the ASSA ABLOY GROUP and is headquartered in Phoenix, Arizona. For more information, please visit LifeSafety Power or call (888) 577-2898.

About ASSA ABLOY

The ASSA ABLOY Group is the global leader in access solutions. The Group operates worldwide with 48,500 employees and sales of SEK 84 billion. The Group has leading positions in areas such as efficient door openings, trusted identities and entrance automation. ASSA ABLOY's innovations enable safe, secure and convenient access to physical and digital places. Every day, we help billions of people experience a more open world.
