

Overview

KISI Unified Power Systems combine FlexPower® power modules alongside KISI controller modules in one compact and secure UL Listed solution.

This unit is a 150W 12V and 24V DC dual voltage access power system.

The C8 lock control module provides eight access control inputs capable of voltage or dry contact activation, and eight fused outputs programmable for failsafe / failsecure operation at either 12 or 24 VDC and controlled by the integrated fire alarm interface circuit on the FPO. One D8 module provides eight fused outputs and each output is configurable for 12 or 24VDC operation.

KISI access enclosures are painted steel with two removable KISI module backplates and include lock, two (2) keys and tamper switch.
