

Overview

LCLASS™ multi-purpose enclosures offer maximum flexibility, functionality and savings to access system designers. LCLASS enclosures are engineered to provide multiple voltage outputs while monitoring a maximum of 72 individual outputs for presence and integrity in one compact system. The E8L will house up to 750 watts of power and nine, eight output network managed distribution boards.

To prevent damage to system electronics, the backplate separates from the enclosure for access hardware mounting in the shop while wiring is pulled to the enclosure at the job site. Once configured, the backplate can be remounted for final ties and checkout.

Features

- Mounts LSP power and access hardware in a variety of combinations
- Removable backplate simplifies job installation
- Protected AC input terminal - meets arc protection requirements
- AC on/off circuit breaker switch
- Pre-engineered access mounting pattern
 - ◆ Power and distribution boards are mounted and pre-wired
- Mechanical upgrades
 - ◆ Removable door with quick disconnect grounding strap
 - ◆ 6.5" enclosure depth accommodates 12Ah battery sizes
 - ◆ Lock with two (2) keys and installed tamper switch
 - ◆ 16 Gauge steel with LSP black textured finish
 - ◆ Multiple knockouts all four sides

Flexible Backplate Mounting System

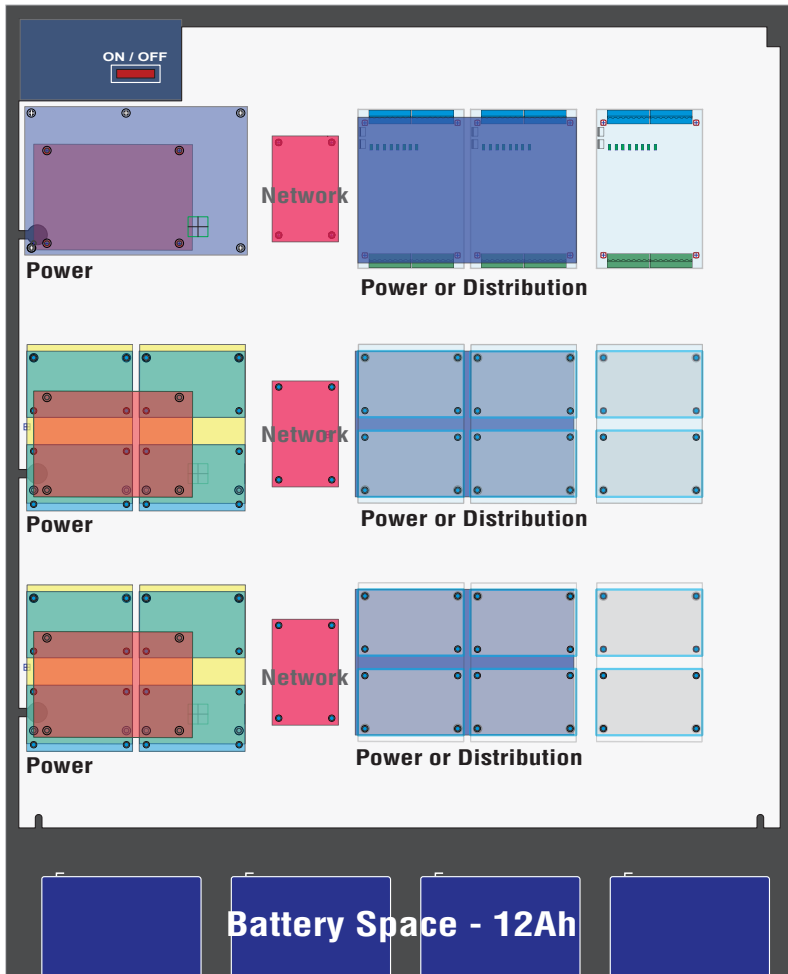

The E8L main backplate is removable and mounts up to 72 controlled or managed relay outputs.

Power supply and distribution boards mount on threaded backplate studs for front side work convenience.

Separate battery compartment beneath the backplate accommodates up to four (4) 12AH batteries.
