

*For immediate release*

## **LifeSafety Power Offers Free, Easy-to-Mount LED Light Kit for E6, E8 and E12 ProWire® Unified Power Solutions®**

*Installers now have the proper illumination to complete their projects more quickly and manage power more effectively.*

**Phoenix, AZ, September 11, 2024** — LifeSafety Power's ProWire® now includes magnetic, LED light strips for the E6, E8 and E12 products – a free, value-add component that brings instant illumination to enclosures to assist with installing, managing and servicing power solutions.

Power supply enclosures are commonly located in dark or remote environments, like IT closets, compact data centers or other locations where space – and light – is at a minimum. All LifeSafety Power ProWire E6, E8 and E12 systems now include the LED Light Kit featuring the option of 12VDC or 24VDC operation, tool-free mounting and PIR motion sensor.

"There's a definite buzz around the release of the LED Light Kits judging from the positive comments we continue to receive since its release in early September," says Keith Kober, Senior Sales Director. "LifeSafety Power is focused on improving the installation experience with this component, which can work with 12 and 24VDC for plug-and-play versatility."

The E6 enclosure light kit features an 18-inch LED configuration for enhanced visual management of the system. The E8 and E12 enclosures, designed for access control projects consisting of 16 doors and up, include a 28-inch LED Light Kit and both emit 400 lumens of natural/daylight illumination per foot. The PIR sensor activates the LED when the enclosure door opens or movement is detected. It automatically shuts off after 15 minutes or when motion is no longer sensed.

The light kits use minimal power and stay cool during operation, with the LEDs offering long-life and reliable operation. The unit is easily mounted at the top of the enclosure with powerful magnets and accommodates different wire lengths with splicing, lever-style connectors. The LEDs can be powered using existing C8, D8, M8 or SD4/16 outputs.

ProWire is LifeSafety Power's prewired Unified Power Solution designed for consistent, professional enclosures and featuring integrations with leading access control manufacturers.

### **About LifeSafety Power\***

LifeSafety Power is a premier manufacturer of intelligent power management systems for physical security and access control and the chosen standard for many Fortune 500 companies around the world.

LifeSafety Power has created new categories of access control power including intelligent power solutions which increase the reliability of the security infrastructure, while prewired components decrease labor and yield more consistent installations across an enterprise. These innovations have led to LifeSafety Power becoming the power solution of choice for leading access control panel OEMs throughout the security industry.

LifeSafety Power has won numerous industry awards for product design and innovation, including the prestigious Security Industry Association New Product Showcase, SSI Most Valuable Product, the Security Today 2021 New Product of the Year and the 2023 Secure Campus Award from Campus Security & Life Safety magazine for BitStream™.

LifeSafety Power is part of the ASSA ABLOY Group and is headquartered in Phoenix, Arizona. For more information, please visit LifeSafety Power or call (888) 577-2898.
